

Beginning Violin Private Group Class(ages 8 & under)

This course is for students who have never played violin before, or have had limited experience with it. It is to replace the current course of violin for ages 8 and under.

With their instrument they will learn rest position, guitar position, playing position, develop their bow hold, and learn string names. Our book will help us begin music reading, ear training, and help us get our fingers moving as we work our way through different pieces. A variety of activities will help support our music reading, and playing as we progress through the class.

Students will need to rent, or purchase, a violin, and acquire an Essential Elements 2000 for Strings: Violin Book 1
